

Module 1

About Fish Insurance

About Fish Insurance

Fish are authorised and regulated by the Financial Conduct Authority (FCA). This means we are required to adhere to the FCA's guiding principles.

A part of this is to ensure organisations understand their responsibilities when arranging insurance on behalf of care users.

Fish specialise in the provision of insurance to the direct payments market.

With over 45 years' experience within this market, Fish are true experts in their field and are one of the UK's market leading insurance providers.

Fish were the pioneers of Independent Living insurance following the introduction of Direct Payments in 1997.
