

HELPING TO PROTECT YOUR MOBILITY

At Fish Insurance we understand how important your mobility is to you – that's why we want to help keep your valuable purchase safe.

Our DNA+ kit will help to keep your mobility equipment from being stolen, so you don't have to suffer the distress, inconvenience, and loss of independence that scooter theft can cause.

DETERS

- The greatest worry for any thief is being caught by the police
- When thieves see the sticker indicating that your mobility scooter is forensically protected, they're more likely to pick an easier target to reduce their risk of being caught

DETECTS

- If a scooter protected with DNA+ is stolen, police will actively look for any sign of forensic coding
- The uniquely-coded microdots in DNA+ mean that your mobility scooter is irrefutably connected to you. This makes your lost or stolen mobility scooter more likely to be returned to you

PROTECTS

- Helping to protect you from theft means we can continue to provide you with competitive insurance premiums
- Our most important objective is to protect you from the irritation, inconvenience and stress that theft can cause

A FEW THINGS TO AVOID

- Don't dilute the solution
- Don't apply it to moving parts, e.g. nuts and bolts, keys and switches
- Don't store or use in extreme hot or cold temperatures
- Don't write with the solution; a dab is all that is required
- Don't apply on to surfaces which you wish to remain clear of marking. If this happens, wipe immediately with a damp cloth

IMPORTANT SAFETY NOTICE: Please keep Fish Insurance DNA+ out of reach of children and animals. Fish Insurance DNA+ microdots are suspended in a water based forensic adhesive and although not toxic, care should be taken not to drink or allow it to enter the eyes. In the event of contact with eyes they should be flushed with clean water. Some sensitive skin types may be irritated by contact with the adhesive. In the event of contact wash with soap and water. Liability for damage to property will not be accepted if these application guidelines are not followed correctly.

HOW IT WORKS

Your bottle contains a DNA solution with uniquely-coded microdots, registered exclusively to you.

Each Fish Insurance forensic microdot is just 1mm in diameter.

ACTUAL SIZE OF MICRODOT ►

DNA+ is proven by police to be a powerful deterrent to thieves, as well as meaning lost or stolen items are more likely to be returned.

WHERE SHOULD YOU APPLY FISH INSURANCE DNA+

- Apply on various hidden places on your mobility scooter (joints, indents, slots & grills)
- Microdots dry clear, but may be visible on light surfaces
- Avoid flat shiny surfaces and those that are subject to wear

If you have any concerns, we suggest that you test on a discreet area or similar surface beforehand

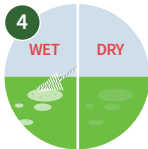

Ensure all surfaces on the scooter are clean, dry and free from any grease, oil or dirt

Shake the dispenser thoroughly to ensure microdots are evenly distributed throughout the liquid

Unscrew cap and dab brush along the surface to be marked, gently rotating to ensure microdots are applied correctly

Aim to apply the DNA+ to a number of areas - the liquid is white when applied but dries clear

When finished, clean the top of the bottle and replace the cap securely
